Betty & Veronica #278 Dan Parent, Rich Koslowski, Jack Morelli, 2015-10-21 It's the dawn of a new beginning for Betty and Veronica! Go to one final prom with Betty and Veronica before the Riverdale High School gym is torn down! The girls commemorate this momentous occasion with a magical trip down Memory Lane, where they reminisce about past dances—the romance, the tears, the laughter, all of Archie's awkward dance moves, all the times he made a date for the same night with both girls... wait a minute, maybe it wasn't all that great! This time the girls turn it around on Archie for one "Last Dance" in this monumental issue of Betty and Veronica!

Chaos: A Statistical Perspective Kung-Sik Chan, Howell Tong, 2001-08-09 This book discusses dynamical systems that are typically driven by stochastic dynamic noise. It is written by two statisticians essentially for the statistically inclined readers. It covers many of the contributions made by the statisticians in the past twenty years or so towards our understanding of estimation, the Lyapunov-like index, the nonparametric regression, and many others, many of which are motivated by their dynamical system counterparts but have now acquired a distinct statistical flavor.

Attractive Performances F. G Naerebout,2023-07-17 This book is not another history of the dance in ancient Greece, but wants to lay the groundwork on which such a history should properly be build. The three preliminary studies offered here are, first, an extensive historiography of the subject which seeks to illuminate where we stand at present in reference to the large amount of work done on ancient Greek dance for the past 500 years. Secondly, an exercise in source criticism, embracing both texts and imagery, in order to establish the limits to which we can push any investigation, and thirdly, an attempt at model building to provide an explicit theoretical framework for future research. This is the first time that some of the approaches of the new dance scholarship which has arisen during the past few decades have been systematically applied

to the dancing of the ancient world.

Bayesian Multilevel Models for Repeated Measures Data Santiago Barreda, Noah Silbert, 2023-05-18 This comprehensive book is an introduction to multilevel Bayesian models in R using brms and the Stan programming language. Featuring a series of fully worked analyses of repeated measures data, the focus is placed on active learning through the analyses of the progressively more complicated models presented throughout the book. In this book, the authors offer an introduction to statistics entirely focused on repeated measures data beginning with very simple two-group comparisons and ending with multinomial regression models with many 'random effects'. Across 13 well-structured chapters, readers are provided with all the code necessary to run all the analyses and make all the plots in the book, as well as useful examples of how to interpret and write up their own analyses. This book provides an accessible introduction for readers in any field, with any level of statistical background. Senior undergraduate students, graduate students, and experienced researchers looking to 'translate' their skills with more traditional models to a Bayesian framework will benefit greatly from the lessons in this text.
